General Product Information

Product Test Conditions

LUXEON Z Colors LEDs are tested and binned with a DC drive current of 500mA at a junction temperature, T_j , of 25°C or 85°C, depending on the product.

Part Number Nomenclature

Part numbers for LUXEON Z Colors follow the convention below:

L X Z 1 – P **A** 0 **B**

Where:

- A** – designates color (A=Deep Red, D=Red, H=Red-Orange, L=Amber and PC Amber, X=Lime, M=Green, E=Cyan, B=Blue and R=Royal Blue)
- B** – designates color version (example: 1, 2, 3)

Therefore, the following part number is used for a version 2 Red LUXEON Z:

L X Z 1 – P **D** 0 **2**

2. Total angle at which 90% of total luminous flux is captured.
3. Viewing angle is the off axis angle from the LED centerline where the luminous intensity is ½ of the peak value.
4. All Deep Red, Red, Red-orange and Amber products are built with Aluminum Indium Gallium Phosphide (AlInGaP).
5. All PC Amber, Lime, Green, Cyan, Blue and Royal Blue products are built with Indium Gallium Nitride (InGaN).

Product Bin and Labeling Definitions

Decoding Product Bin Labeling

In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical datasheet. For this reason, Lumileds bins LED components for luminous flux or radiometric power, color point, peak wavelength, dominant wavelength and forward voltage.

Reels of LUXEON Z Deep Red, Red, Red-Orange, Amber, Lime, Green, Cyan, Blue and Royal Blue are labeled using a 3-digit alphanumeric CAT code following the format below.

A B C

- A** – designates luminous flux or radiometric power bins (example: K=96 to 104 lumens, V=194 to 204 lumens)
- B** – designates peak or dominant wavelength bin (example: Green 2=525 to 530nm, Cyan 7=495 to 500nm, Blue 4=475 to 480nm)
- C** – designates forward voltage bin (example: 2=2.50 to 2.75V, 6=3.00 to 3.25V)

Therefore, a LUXEON Z Green LED with a lumen range of 96 to 104, a dominant wavelength of 525 to 530nm and a forward voltage range of 2.50 to 2.75V has the following CAT code:

K 2 4

Reels of LUXEON Z PC Amber are labeled using a 4-digit alphanumeric CAT code following the format below.

A B C D

- A** – designates luminous flux bin (example: K=96 to 104 lumens, L=104 to 114 lumens)
- B C** – designates peak wavelength bin (example: A1)
- D** – designates forward voltage bin (example: 3=2.25 to 2.50V, 5=2.75 to 3.00V)

Therefore, a LUXEON Z PC Amber LED with a lumen range of 104 to 114, color bin of A1 and a forward voltage range of 2.75 to 3.00V has the following CAT code:

L A 1 5
